- Proudly NZ Designed & Manufactured
- Select from more than 80 notification options
- Bank level encryption
- Intuitive security & control

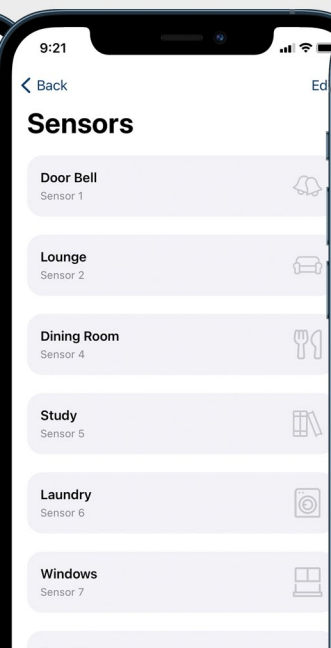

Alerts

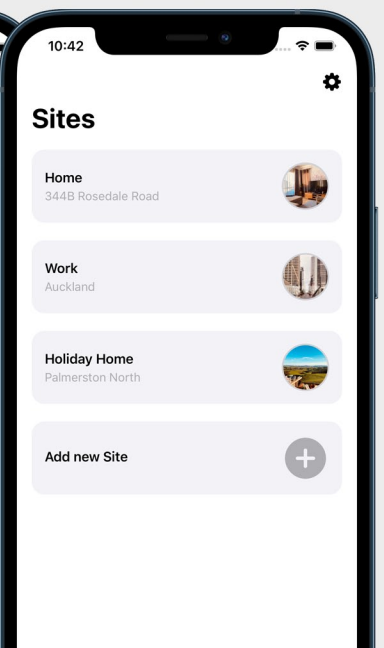

Controls

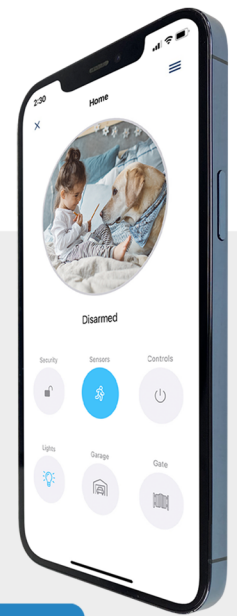

Sensors

Sites

Intuitive security & control

Home

Arm, stay arm or disarm your alarm system from almost anywhere. EliteCloud provides a secure, bank level encrypted connection from almost any smart device to your home or business

5 Year Warranty

Sensors

Information from each sensor is sent to the cloud & displayed in real time on the EliteCloud app. Windows & doors show as open/closed, along with any movement of occupants or intruders

Control

Doors, gates, lights & more can be connected to the cloud and controlled from your smartphone. Allow staff, friends, family, couriers or customers access to your home, business or rented space from almost anywhere

History

Access all alarm history including who armed or disarmed your system, sensor activations & even which doors were opened or closed. Each history event includes an associated time & date to accurately review & analyse your data

Notify

Alarm & alert notifications are sent directly to your smartphone, whether you are home or away. Notifications are configurable within the EliteCloud app including arm, disarm, intrusion, fire, perimeter breach & more
